

There
you go!

Good work!
You understand
the place value
expansion

There
you go!

Good work!
You understand
the place value
expansion

Good work!

Below is the reason for
expansion and simplification!

By simplifying the numbers
you will now know which
numbers you should add or
subtract!

$$\begin{array}{r} \boxed{\{832\}} + \boxed{\{490\}} \\ \boxed{800} + \boxed{400} = \boxed{1200} \\ \boxed{30} + \boxed{90} = \boxed{120} \\ \boxed{2} + \boxed{0} = \boxed{2} \\ \\ = \boxed{1322} \end{array}$$

All warmed up?
Let's see how you
fair in Pixie's
Speed Test. Don't
let her disappear!

Do not fret. Click on
